Both the Pilates and **GYROTONIC®** exercise methods offer body conditioning with an emphasis on mind-body connection and the core muscles of the body. The Pilates method, developed by Joseph Pilates, has been around almost a century. The **GYROTONIC®** method, developed by Juliu Horvath around 30 yrs ago, is still growing in it's method and popularity.

WHAT TO EXPECT

- Both methods, although completely separate from each other in creation, help improve strength, joint function, flexibility, breath flow and posture in the body.
- Exercises are executed with a focus on the abdominal area, breath flow, and mind-body awareness.
- Props may be used to enhance the principles of the work on the equipment.
